

He Shoots, He Scores!

San Antonio has a thing for basketball. You know, four NBA Championships, Hall of Famers and such. So, say you're walking along the River Walk. You finish your soda. You see a trash bin ... he shoots, he scores! Get the picture?

Actually, trash around the River Walk area can be a problem for water quality if we're not careful. Food tossed to the wildlife, such as chips and bread scraps, attracts wildlife that become dependent on human handouts and contribute to high bacteria levels in the river.

So, make sure all trash is disposed of properly in the many bins along the River Walk and the downtown San Antonio area. We appreciate your help in keeping the River Walk Watershed (street and river levels) and the San Antonio River clean.

Oh, and if you miss ... rebound, slam dunk.

River. Life. Love it.

Sustaining a healthy river - together.
