

Awwhh! Isn't he cute? But he will pollute.

The squirrels, birds, and other wildlife flock to the River Walk area mostly because people feed them. Unfortunately, too many animals mean too much animal poop in the river--and that's not cute.

The River Walk Watershed Alliance (RWWA) asks you to please not feed the wildlife while you're enjoying the River Walk.

For more information, or to contact an RWWA member, visit www.rwwa.us.

Please don't feed the animals on the River Walk.
